---

As promised by the Joomla! Production Leadership Team, **Joomla!® 1.7.0** was released in July 2011  
*(6 months after the release of 1.6)*

.

Both 1.6 and 1.7 are **Short Term Support releases**, and the next release will be a **Long Term Support release**

.

For *most* people the upgrade from 1.6 to 1.7 will only one click, and most 1.6 Extensions should be compatible with 1.7

Joomla 1.5.x is a Long Term Support release, and will still be supported into 2012, but for *new* web sites, we will be using Joomla 1.7
